# FLORES AND CORVO

THE WESTERNMOST EUROPEAN ISLANDS

# GRACIOSA AND SANTA MARIA

NATURE SPRINGS AND PRISTINE BEACHES

## Write in Pico

Breathe our fresh air, reflect, rest, relax, and inspire yourself and write.

Aldeia da Fonte, on Pico Island, the Azores, is the perfect place to be creative.

The atmosphere is warm and peaceful, the setting is idyllic: six volcanic stone houses (recently renovated) with central heating, carefully decorated for your comfort.

Free High-Speed Internet and a fine dining restaurant. Outside, splendid gardens and black rock bays with crushing waves. The soundscape is filled by tunes of ocean and birds .

## Pico Emotions

"Pico is the most beautiful, the most extraordinary island in the Azores, with a beauty that only it belongs to it, with a wonderful color and a strange power of attraction, is more than an island. Is a statue to the sky and shaped by the fire."

R. Brandão, The Unknown Island

## Weekend in Pico

The air of the island of Pico is wonderful, fine and graceful. It rains and dries right away. This beautiful rock absorbs the humidity as a sponge. The ocean is ongoing and the sky just as well, with a cotton like look, and the clouds are half asleep, in tones of grey. I look at the ocean, snail crawling and white pieces shine within.

R.Brandão, The Unknown Islands

## Atlantic Secret

"Faial lives on memories and myths. Specially Horta. More than just a city, Horta is a feeling. Perhaps of love. Maybe even of passion. Certainly of affection.

Slopping toward the sea, and an oasis of rest and relaxation in the middle of the Atlantic, Horta forms a natural amphitheater with its heart titling toward aesthetic contemplation of local people."

Vítor R. Dores, 2015

## Fajãs Experience

Candidates to the UNESCO World Biosphere Network, in 2015, Sao Jorge Island Fajas are amazing places where time passes slowly, Nature plays out and silence meets the sea.

The spectacular morphology of fajas opens you to unique experiences such as surfing the Caldeira de Santo Cristo, the Canyoning in the waterfalls and streams, dozens of hiking trails or, simply, inaccessibility and isolation.

THE FAJÃS ISLAND

## Hiking Triangle

Nature, green, blue and water, all the water on all forms.

3 islands in the Atlantic, an airplane ticket. Several boat ticket, cheap, short and comfortable travels, with extraordinary panoramic sights.

## Magic Triangle

What magic have a volcano, a mountain and numerous fajãs?

What magic have three islands in the middle of the Atlantic?

Why from a group of nine, these three and only these three?

Are they special in some way?

One horizontal, one vertical, the other port of legends and stories.

## Triangle Gold

Dormant volcanoes, whales and dolphins, unique trails that seem to be walked for the first time, World Heritage vineyards of czars wine, fajãs of canyoning and other extreme sports, sea and underwater banks with mantas, sharks and all the fish, fishing boats, fresh fish grilled, beef that melts and silence, deep silence, peace, serenity.

MOUNTAIN & SEA

**SAO JORGE**  
THE FAJÃS ISLAND

## Mountain and Fajãs Duet

Hike in the Triangle Islands, hike in the splendid and repeatedly awarded azorean Nature, hike in the Landscape of Vineyard Culture (UNESCO World Heritage), hike to isolated Fajãs, hike.

From vineyards to extraordinary vegetation and ocean landscapes, from lagoons to lava tunnels, boilers and volcanic cones, from handicraft and the fajãs coffee to the authentic Azorean local culture.

## Green Explosion

"Always misty and cool, wet, like that voluptuous hill in the background, it is a landscape, hidden and revealing, a feminine landscape at the moment when it is undressed with modesty.

The rain is light, the wet mists are nothing more than dew and when it falls (falls many times), it is in spurts that come from above a whiteness, on the muffled heat."

R.Brandão, Unknown Islands

## Atlantic Nature Wonders

"Flores and Corvo stand in front of each other, separated by a fifteen-mile watercourse. The high cliffs scattered villages, Monte, Fazenda, Cedros, Ponta Ruiva, between the rounded hills and the moors of the hydrangeas dividing the fields.

The coast is approaching with protrusions and blackness, and the tender green of the herbs increasingly tender, standing out from the thick mass, where the increasingly dark peaks emerge."

R.Brandão, Unknown Islands
